Question 1

```
<img src="" onmouseover="afficher()" alt="logo">
<button onclick="afficher()"> click ici pour afficher</button>
```

```
<script>
    function afficher(){
        alert("hey, how was going");
    }
```

Question 2

```
<script>
        function afficher(){
            let a = new Date().getHours()
            switch (true) {
                case (a>=6 && a<=12):
                    alert("BONJOUR");
                    break;
                case (a>=13 && a<=17):
                    alert("Happy Afternoon");
                    break;
                default :
                    alert("Heureuse soirée ")
            }
            }

        afficher()
</script>
```

Question 2.2

```
<script>
        // ======question 2 ,2===========
        let  a= prompt("saisire un nom") , b=confirm("voulez-vous confirmer ce nom");
        if (b){
            alert("bonjour "+a +"!");
        }else {alert("bonjour inconnu !!");}
</script>
```

Question 3

```
<script>
        // ======question 3==========
        let tab =["Morocco" ,"Palestine" , " china" , "usa" , "Russia"];
        let resu =Math.floor(Math.random()*tab.length) ;
        alert(tab[resu])
</script>
```

Question 4

```
<body>
    <!-- <img src="" onmouseover="afficher()" alt="logo">
    <button onclick="afficher()"> click ici pour afficher</button> -->
    <input type="text" id="nom" placeholder="saisir votre nom "><span id="span1"></span>

    <input type="text" id="email" placeholder="saisir votre email "><span id="span2"></span>
    <input type="number" id="age" placeholder="saisir votre age "><span id="span3"></span>
    <button onclick="valider()">valide</button>
```

```
<script>
